---

## PROFESSIONAL SUMMARY

Computer Science Engineering student specializing in Artificial Intelligence and Machine Learning. Passionate about Python development, AI technologies, web development, and building real-world software solutions. Seeking internship opportunities to apply skills and contribute to impactful projects.

## EDUCATION

### B.E. Computer Science Engineering (AIML)

Lokmanya Tilak College of Engineering | 2022 — Present

Specialization: Artificial Intelligence & Machine Learning

## TECHNICAL SKILLS

Programming: Python, C, C++, HTML, CSS, JavaScript

Frameworks & Tools: Django, SQLite, MySQL, Git, GitHub

Domains: Artificial Intelligence, Machine Learning, Web Development, Database Management

## PROJECTS

### Advanced AI-Based Online Exam Proctoring System (2026)

AI-powered exam monitoring detecting suspicious activities using computer vision and ML.

[Python](#), [AI](#), [ML](#), [Computer Vision](#), [SQLite](#)

### FitMate – Gym Management System

Web fitness platform with personalized plans and secure authentication.

[Django](#), [Python](#), [HTML](#), [CSS](#), [JavaScript](#), [SQLite](#)

### Billing Management System

Billing and invoice system for customers, products, and sales.

[Python](#), [MySQL](#)

### Courier Management System

Shipment tracking and delivery status management application.

[Python](#), [Database Management](#)

## CAREER OBJECTIVE

Seeking internship opportunities to apply AI/ML and full-stack development skills, collaborate with industry professionals, and contribute to production-grade software projects.
